Club Members Portal

Flow & Functional Explanation Report

ViceVerse Ideathon Management Platform

1. Purpose of the Club Members Portal

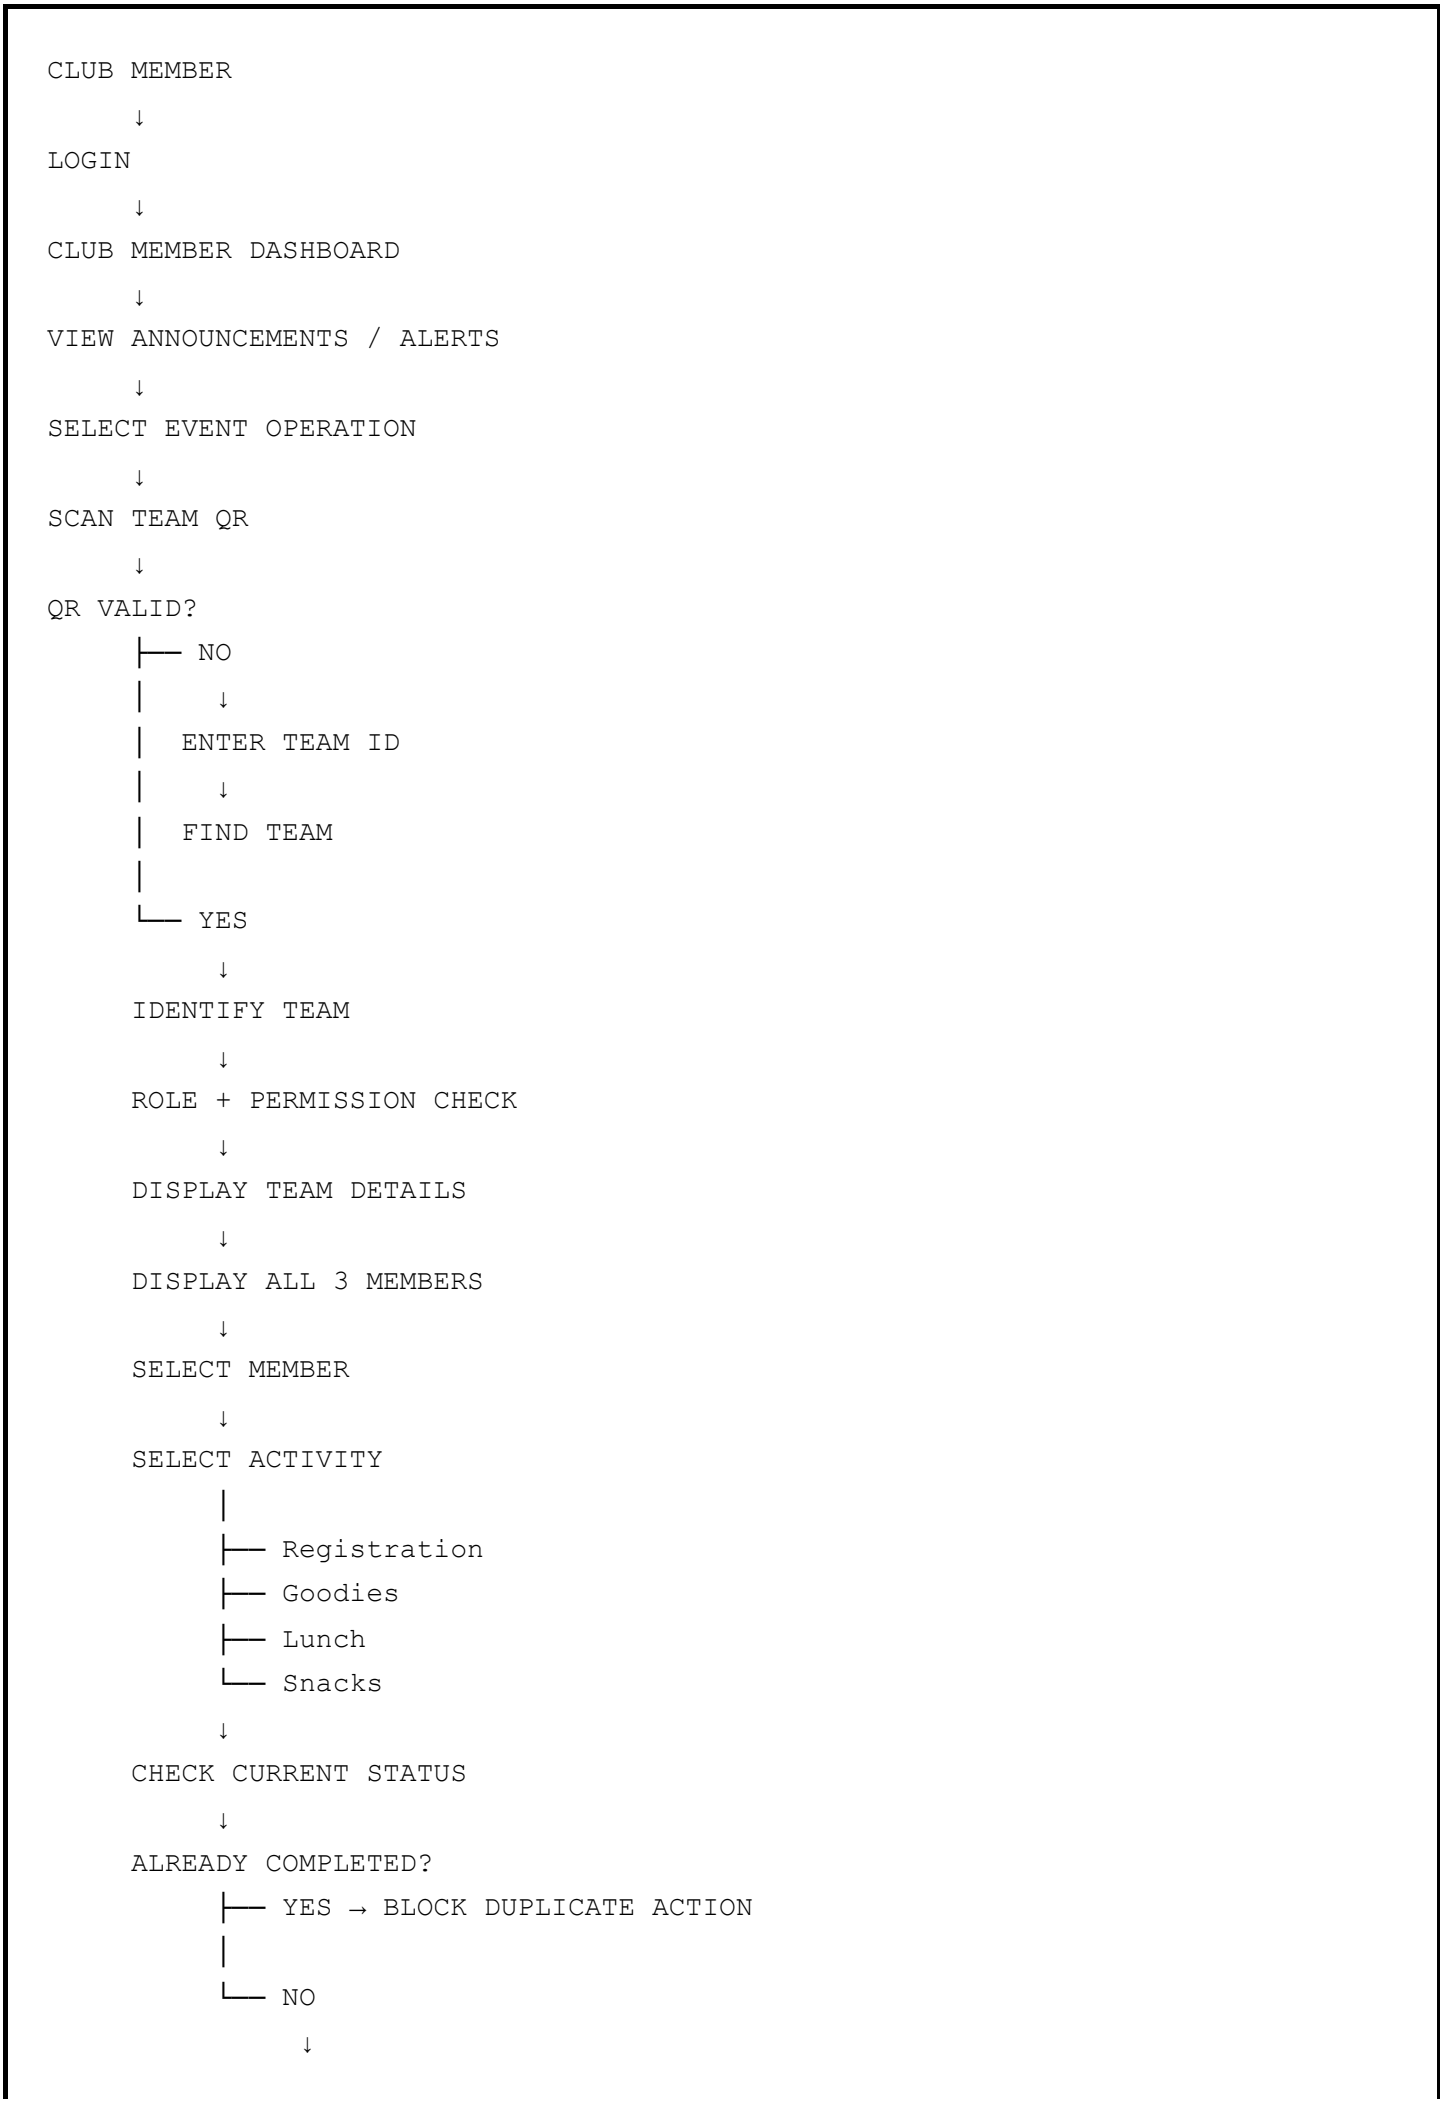

The Club Members Portal is used by authorized club members to manage event-day operations for registered teams.

Its main purpose is to identify a team using the Team QR or Team ID and update the event participation status of each member individually.

The portal handles activities such as:

- Team registration verification
- Goodies distribution
- Lunch distribution
- Snacks distribution
- Member-wise event status tracking
- Duplicate action prevention
- Event operations monitoring
- Admin announcements and alerts

2. Overall Club Member Flow

CLUB MEMBER
↓
LOGIN
↓
CLUB MEMBER DASHBOARD
↓
VIEW ANNOUNCEMENTS / ALERTS
↓
SELECT EVENT OPERATION
↓
SCAN TEAM QR
↓
QR VALID?
├── NO
│ ↓
│ ENTER TEAM ID
│ ↓
│ FIND TEAM
│
└── YES
↓
IDENTIFY TEAM
↓
ROLE + PERMISSION CHECK
↓
DISPLAY TEAM DETAILS
↓
DISPLAY ALL 3 MEMBERS
↓
SELECT MEMBER
↓
SELECT ACTIVITY
│
├── Registration
├── Goodies
├── Lunch
└── Snacks
↓
CHECK CURRENT STATUS
↓
ALREADY COMPLETED?
├── YES → BLOCK DUPLICATE ACTION
│
└── NO
↓

```
UPDATE STATUS
     ↓
RECORD ACTION
     ↓
AUDIT LOG
     ↓
RETURN TO TEAM / NEXT SCAN
```

3. Club Member Login

```
CLUB MEMBER
     ↓
LOGIN
     ↓
ENTER CREDENTIALS
     ↓
AUTHENTICATION
     ↓
ROLE CHECK
     ↓
CLUB MEMBER DASHBOARD
```

Only authenticated users with the appropriate Club Member role can access event-operation functions.

Login authentication and role verification should be performed server-side.

4. Club Member Dashboard

After login, the Club Member is taken to the event operations dashboard.

```
CLUB MEMBER DASHBOARD

├── Scan Team QR
│
├── Enter Team ID
│
├── Team Search / Verification
│
├── Event Operations
│   ├── Registration
│   ├── Goodies
│   ├── Lunch
│   └── Snacks
│
├── Announcements / Alerts
│
├── Operations Status
│
└── Logout
```

5. Team QR Scanning

Each confirmed team receives one unique Team QR. The QR represents the team and is used to retrieve the team's record.

```
SCAN TEAM QR
     ↓
READ SECURE QR TOKEN
     ↓
FIND TEAM RECORD
     ↓
TEAM FOUND?
     ├── NO → SHOW INVALID QR
     │
     └── YES
          ↓
     LOAD TEAM
          ↓
     SHOW TEAM DETAILS
```

The QR should identify the team through a secure token or reference. It should not directly contain unnecessary personal information.

6. Team ID Fallback

If QR scanning is unavailable or fails, the Club Member can manually enter the Team ID.

```
QR SCAN FAILED / UNAVAILABLE
          ↓
ENTER TEAM ID
          ↓
SEARCH TEAM
          ↓
TEAM FOUND?
     ├── NO → SHOW ERROR
     │
     └── YES
          ↓
     LOAD TEAM DETAILS
```

> Team ID is a fallback identification method. It does not itself grant permission to perform an event operation.

7. Team Identification

Once the team is identified, the portal displays the team information required for event operations.

Example

Team ID: IDN26-042

Team Name: Example Team

Domain: Example Domain

Member	Registration	Goodies	Lunch	Snacks
Member 1	Completed	Completed	Pending	Pending
Member 2	Completed	Pending	Pending	Pending
Member 3	Pending	Pending	Pending	Pending

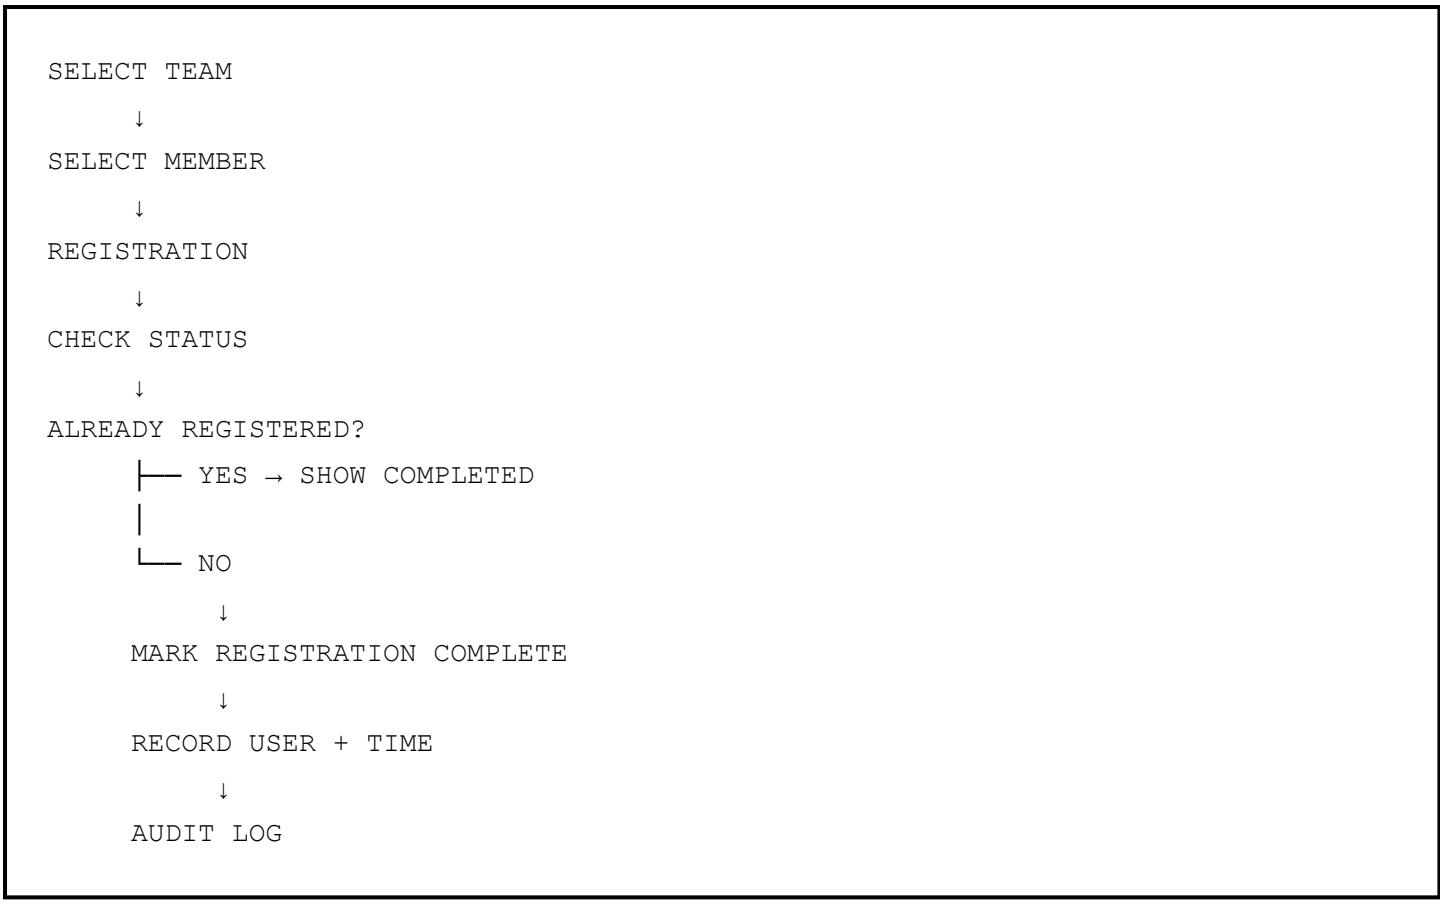

8. Member-Wise Tracking

Event operations are tracked separately for each member. The system must not treat the team as a single unit for distribution activities.

```
TEAM
│
├── MEMBER 1
│    ├── Registration
│    ├── Goodies
│    ├── Lunch
│    └── Snacks
│
├── MEMBER 2
│    ├── Registration
│    ├── Goodies
│    ├── Lunch
│    └── Snacks
│
└── MEMBER 3
     ├── Registration
     ├── Goodies
     ├── Lunch
     └── Snacks
```

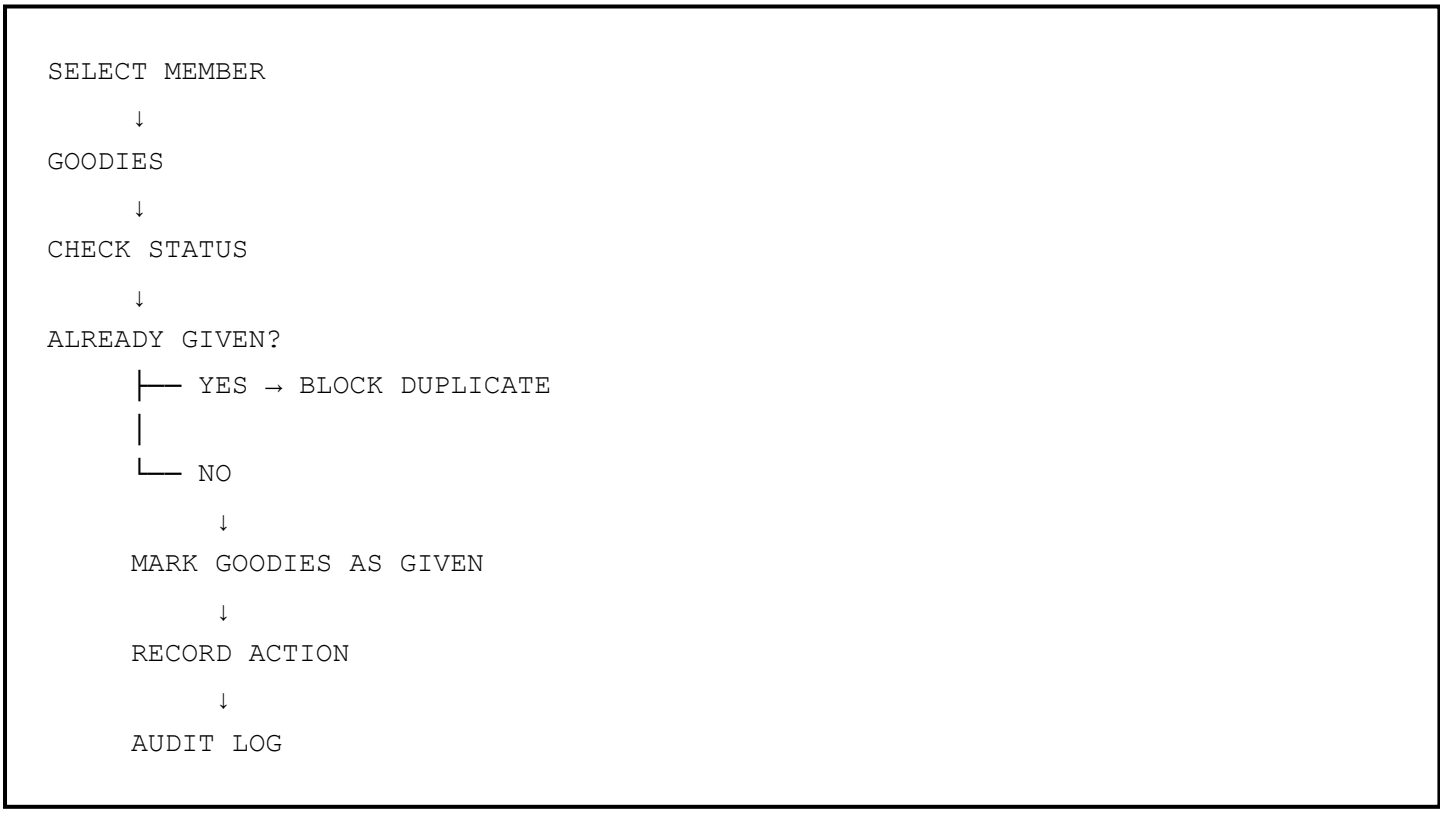

This allows Club Members to identify exactly which team member has completed each event activity.

9. Registration Tracking

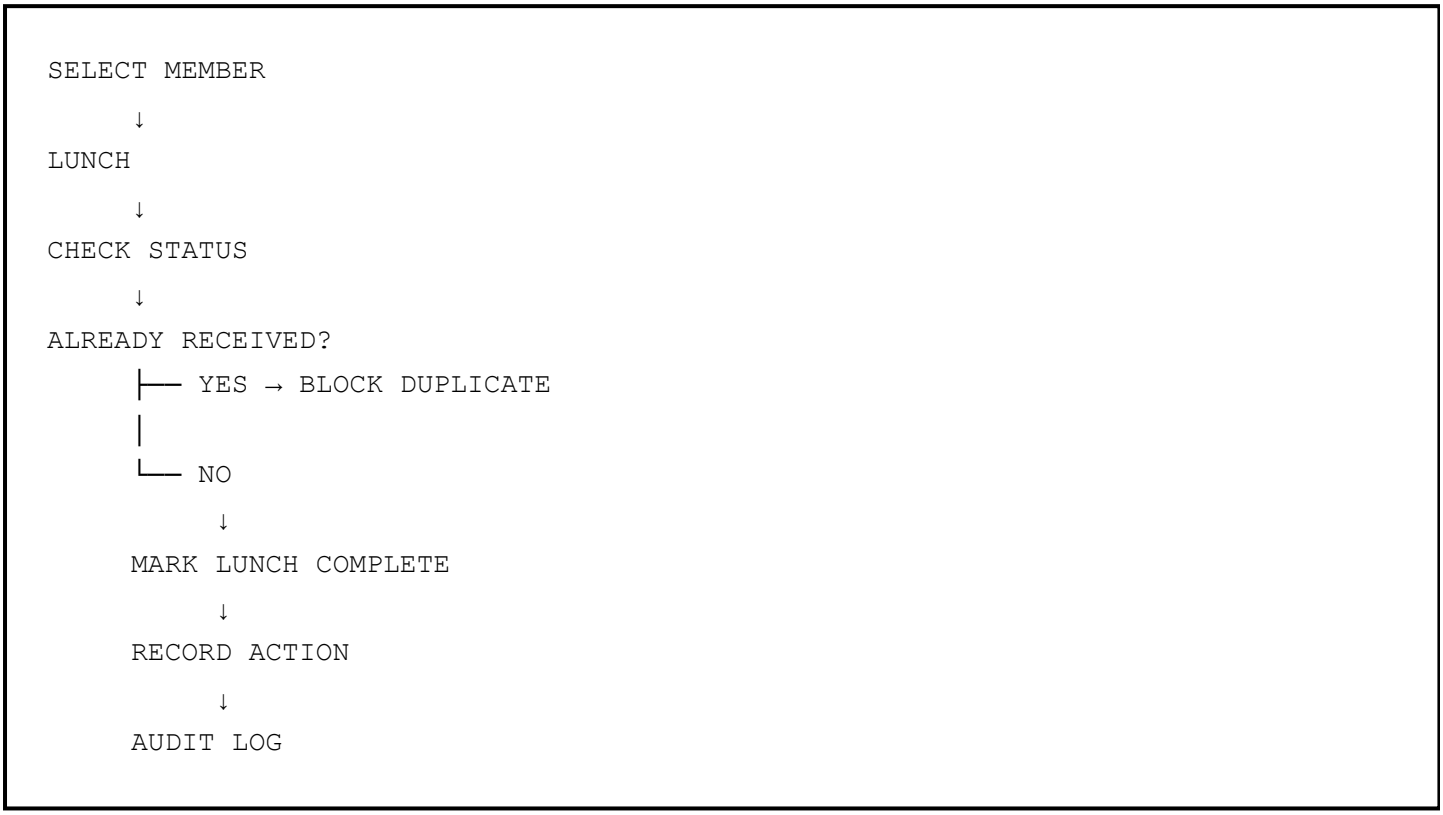

Registration status is maintained separately for each team member.

10. Goodies Distribution

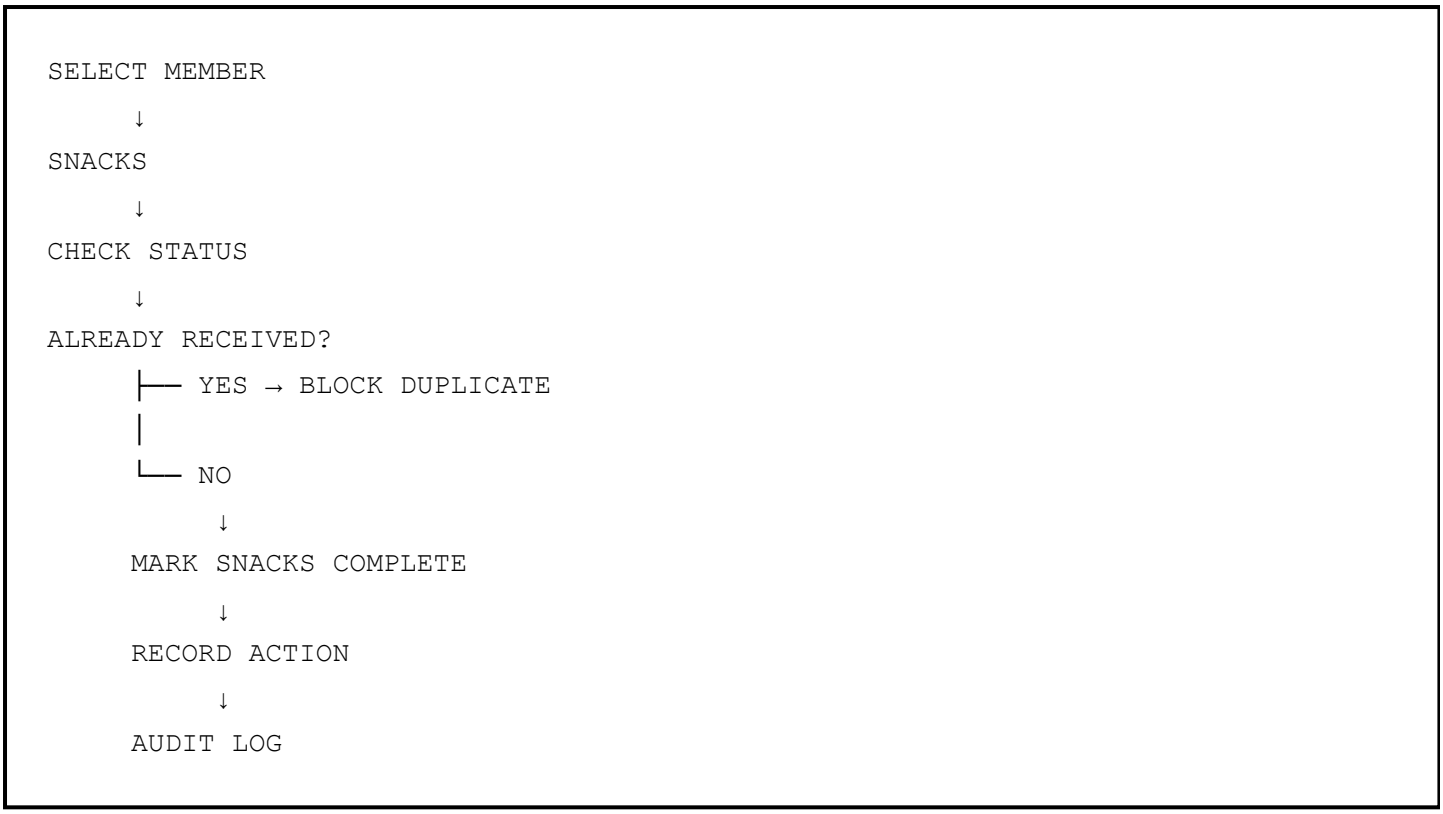

Once goodies are marked as distributed, the same action should not be performed again unless an authorized administrator reopens or corrects the record.

11. Lunch Tracking

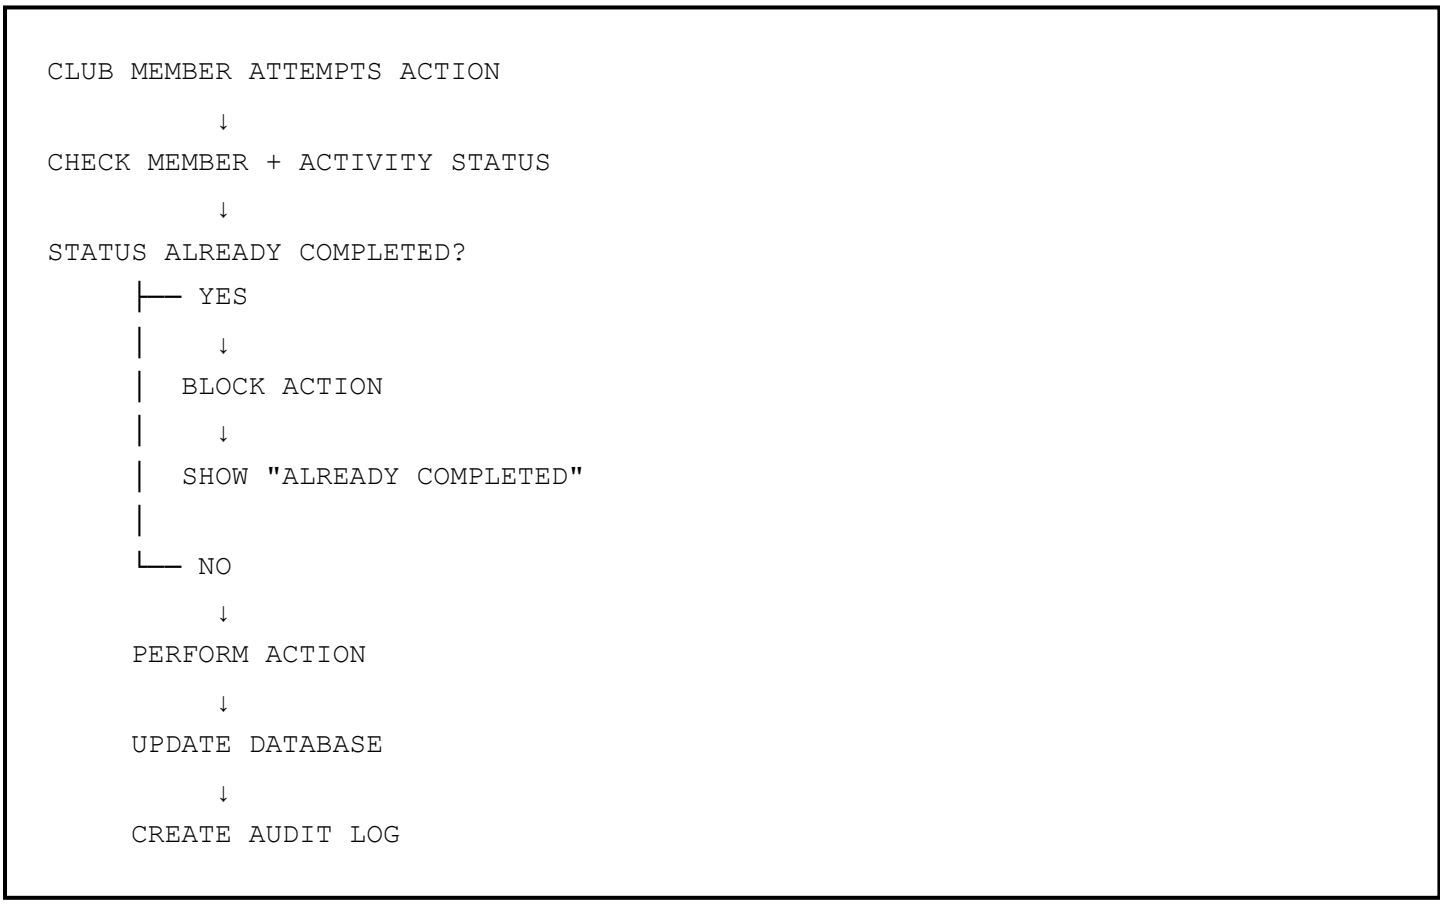

12. Snacks Tracking

13. Duplicate Prevention

Duplicate distribution or registration actions must be prevented.

The duplicate check must be enforced by the backend/database and not only by disabling a button in the frontend.

14. Announcements & Alerts

Admin announcements are available to Club Members through the portal. These announcements are intended for important event information, operational instructions, schedule updates, and other organizer communication.

```
ADMIN
  ↓
CREATE ANNOUNCEMENT
  ↓
ENTER TITLE + MESSAGE
  ↓
PUBLISH
  ↓
ANNOUNCEMENT STORED
  ↓
AVAILABLE TO CLUB MEMBER PORTAL
  ↓
CLUB MEMBER DASHBOARD
  ↓
ANNOUNCEMENT / ALERT
  ↓
CLUB MEMBER READS MESSAGE
```

Club Members can view announcements but cannot create, edit, publish, or delete them.

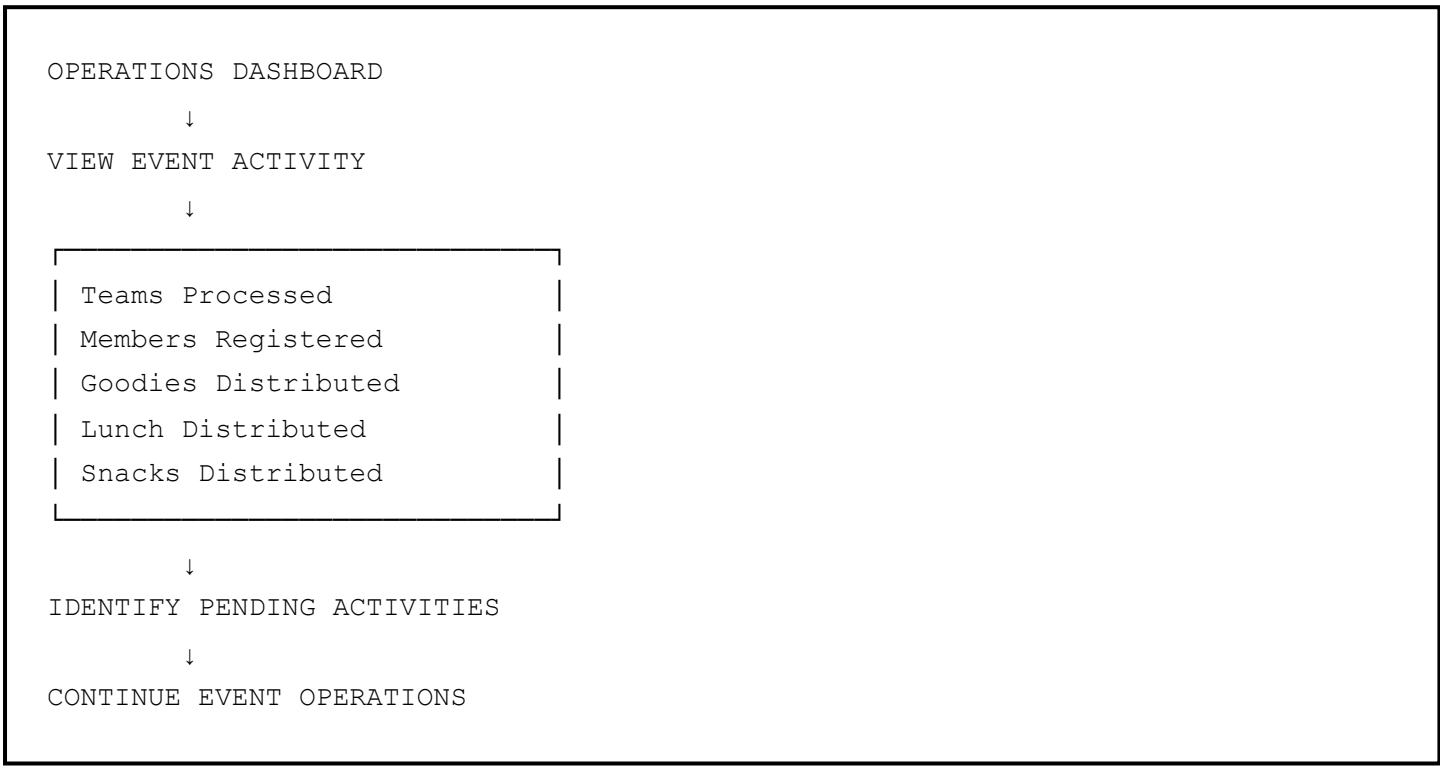

Announcement Access

Action	**Club Member**
View announcements	Allowed
Receive alerts	Allowed
Create announcement	Not allowed
Edit announcement	Not allowed

Delete announcement	Not allowed

15. Operations Monitoring

The Club Member Portal can provide an operations view to help authorized club members understand the current event status.

The exact dashboard metrics can be configured according to the event's operational requirements.

16. Club Member Navigation

```
CLUB MEMBER PORTAL

Dashboard
│
├── Announcements
│   └── View Alerts
│
├── Scan Team QR
│
├── Enter Team ID
│
├── Team
│   ├── Team Details
│   └── Members
│
├── Event Operations
│   ├── Registration
│   ├── Goodies
│   ├── Lunch
│   └── Snacks
│
├── Operations Status
│
└── Logout
```

17. Role & Permission Control

A Team QR or Team ID only identifies a team. It does not authorize someone to update the team's event records.

```
USER
 ↓
AUTHENTICATION
 ↓
ROLE CHECK
 ↓
CLUB MEMBER?
 ├── NO → DENY OPERATION
 │
 └── YES
      ↓
PERMISSION CHECK
      ↓
VALID OPERATION
      ↓
ALLOW ACTION
```

Authorization must be checked on the server side for every important operation.

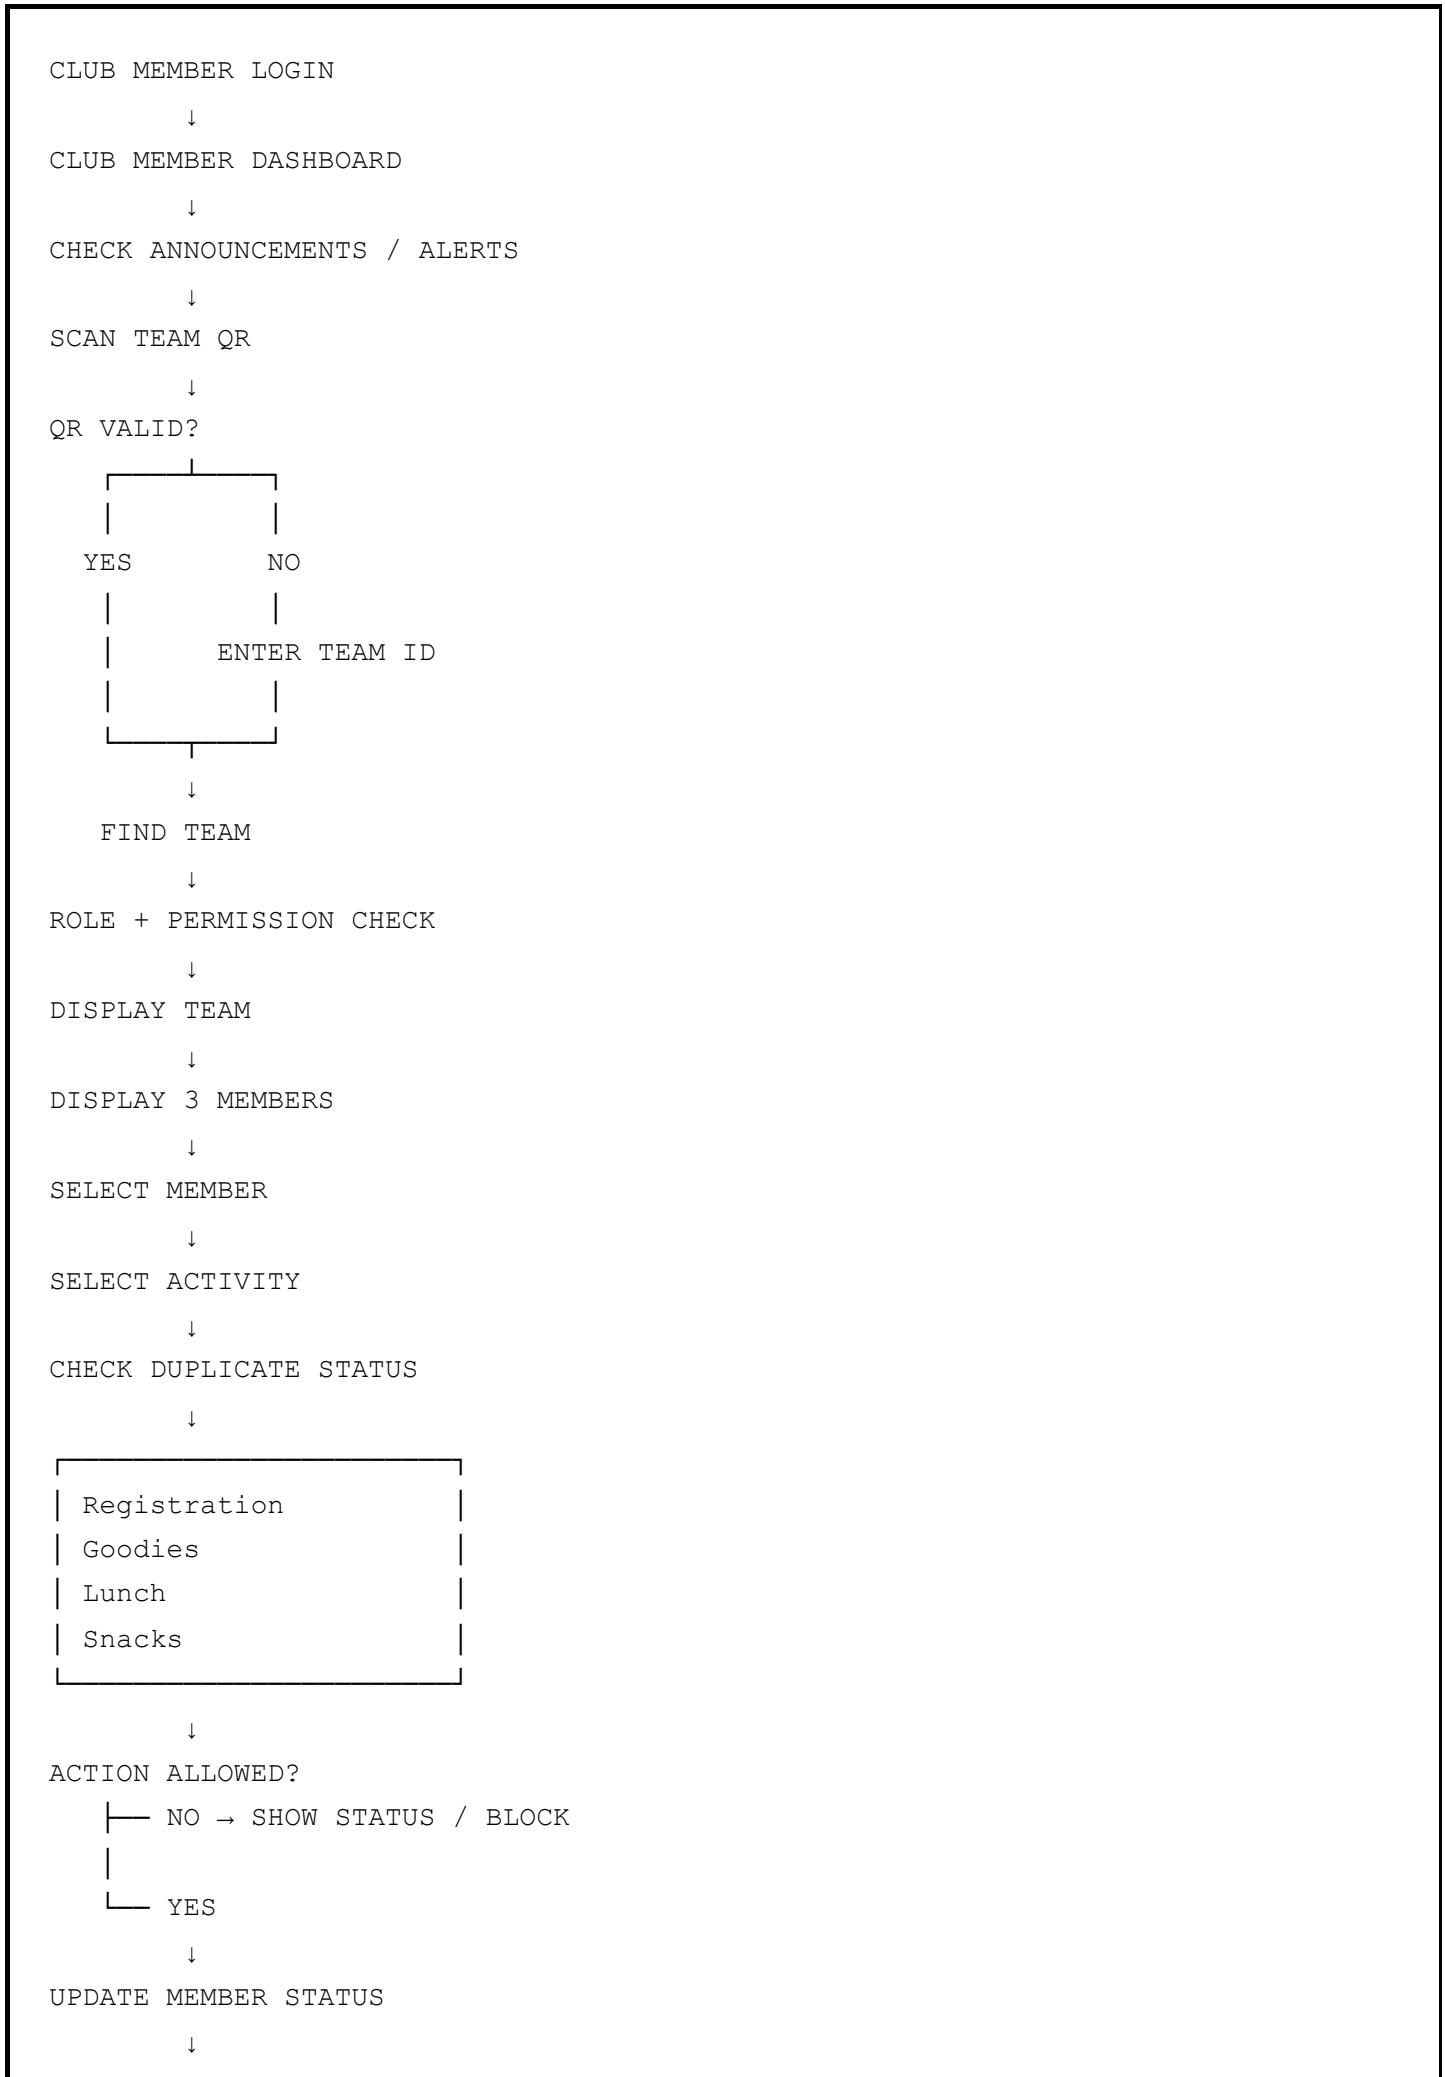

18. Audit Logging

Important event operations should be recorded in the audit log.

```
CLUB MEMBER
     ↓
PERFORMS ACTION
     ↓
SYSTEM VALIDATES ACTION
     ↓
DATABASE UPDATED
     ↓
AUDIT LOG CREATED
     ↓
STORE:
     ├── User
     ├── Team
     ├── Member
     ├── Activity
     ├── Action
     └── Timestamp
```

Audit logs allow administrators to review important event operations and identify when and by whom an action was performed.

19. Complete Event Operation Flow

CLUB MEMBER LOGIN

```

20. Club Member Permissions

Function	**Club Member**
Login	Allowed
View announcements	Allowed
Scan Team QR	Allowed
Enter Team ID	Allowed
View team members	Allowed
Mark registration	Allowed
Mark goodies	Allowed
Mark lunch	Allowed
Mark snacks	Allowed
View operations status	Allowed
Create announcement	Not allowed
Modify team details	Not allowed
Modify payment	Not allowed
Judge teams	Not allowed
Publish results	Not allowed

Access Admin functions	Not allowed

21. Security & Access Control

- Club Members must authenticate before accessing event operations.
- Role and permission checks must be performed server-side.
- QR tokens should be secure and non-guessable.
- QR codes should not directly expose unnecessary personal information.
- Team ID should only identify the team.
- Team ID must not act as an authorization credential.
- Duplicate event actions must be prevented at the backend/database level.
- Important actions should be audit logged.
- Club Members cannot access Admin, Judge, or Team Leader functions.

22. Data Used by the Club Member Portal

Data	**Purpose**
Team ID	Identify the team
Team Name	Display team information
Team Members	Identify individual participants
Registration Status	Track event entry
Goodies Status	Track goodies distribution
Lunch Status	Track lunch distribution
Snacks Status	Track snacks distribution
QR Token	Secure team identification
Audit Information	Track important operations
Announcements	Receive organizer communication

23. Responsibility of the Club Member Portal Team

Puttashankar Prasad — QR & Event Entry

- Club Member login integration
- QR scanning
- Team QR identification
- Team ID fallback
- Team entry verification

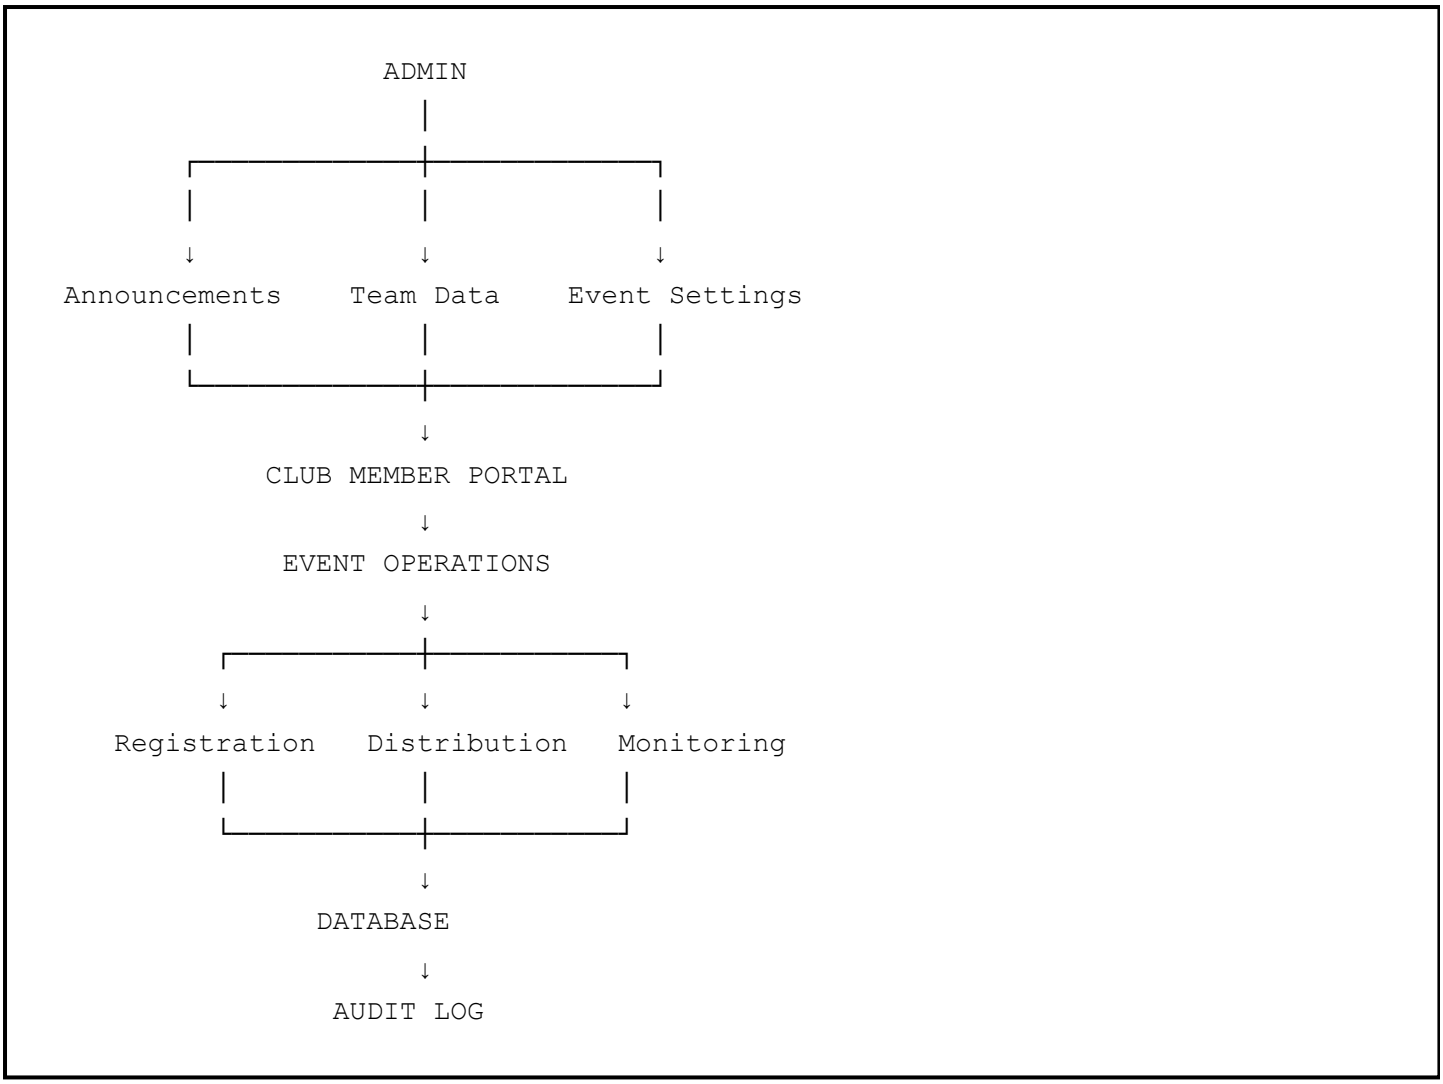

Prasiddh — Member Activity Tracking

- Member-wise status tracking
- Registration tracking
- Goodies tracking
- Lunch tracking
- Snacks tracking
- Duplicate prevention

Bidappa — Operations Dashboard

- Operations dashboard
- Event status monitoring
- Pending activity visibility
- Operational summaries
- Audit information visibility where permitted

24. Relationship With Other Portals

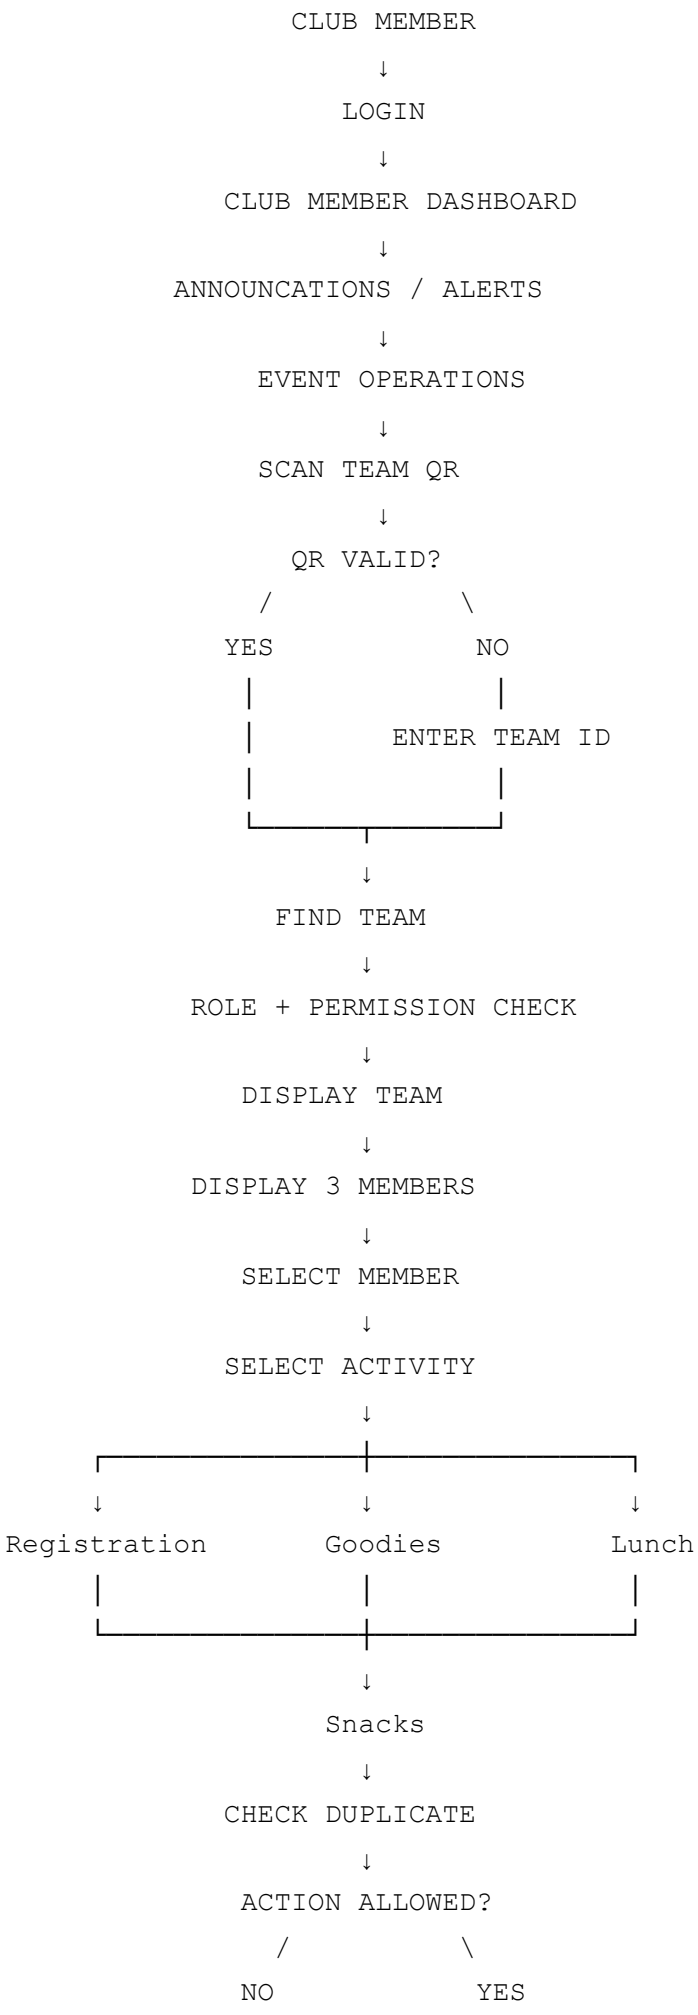

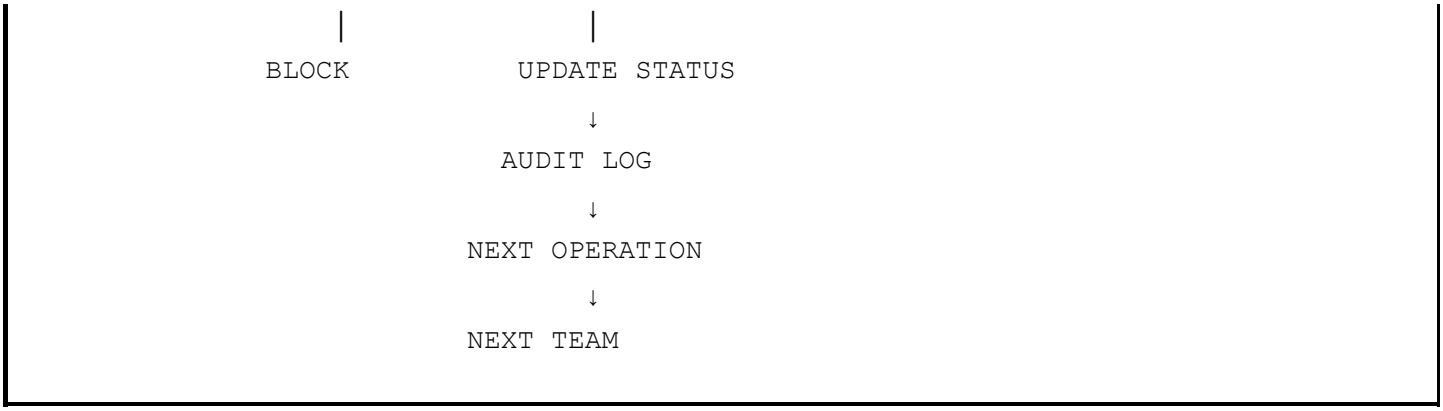

25. Functional Summary

Area	**Function**
Authentication	Club Member login and role verification
Team Identification	QR scanning and Team ID fallback
Team View	Display team and all three members
Registration	Member-wise registration tracking
Goodies	Member-wise goodies distribution tracking
Lunch	Member-wise lunch distribution tracking
Snacks	Member-wise snacks distribution tracking

Duplicate Protection	Prevent repeated event actions
Announcements	Receive Admin announcements and alerts
Operations	Monitor event-day activity
Audit	Record important actions
Security	Authentication, authorization and backend validation
