ViceVerse Ideathon

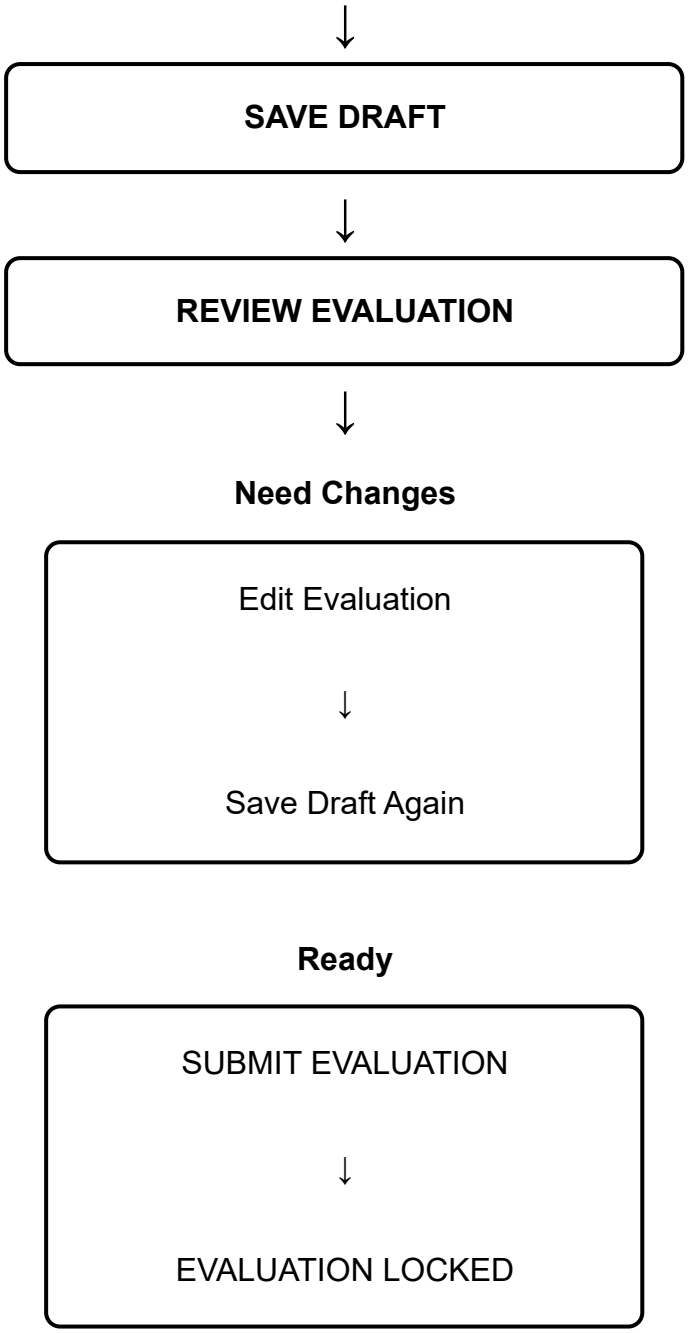

Judge Portal — Flow & Functional Explanation

This document describes the complete workflow, functionality, permissions and evaluation process of the Judge Portal.

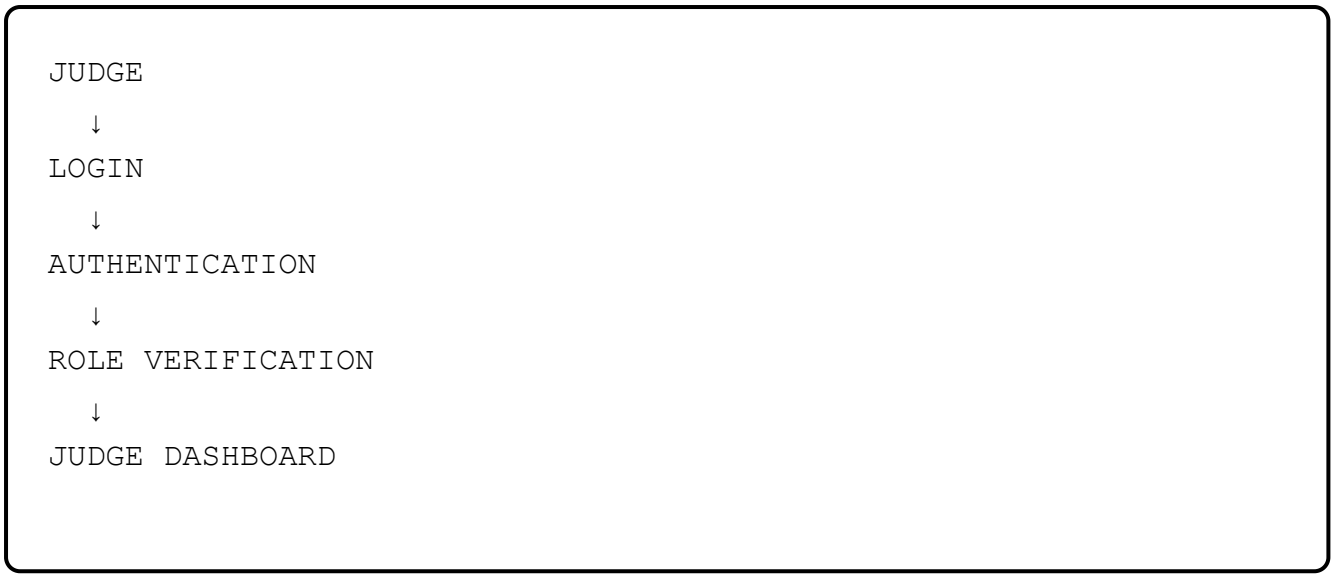

---

1. Judge Portal — Overall Flow

JUDGE
JUDGE LOGIN
JUDGE AUTHENTICATION
JUDGE DASHBOARD
VIEW ASSIGNED TEAMS
SELECT ASSIGNED TEAM
OPTIONAL: VIEW PROJECT DETAILS / PPT / MATERIALS
OPEN CURRENT EVALUATION ROUND
VIEW ADMIN-CONFIGURED CRITERIA
ENTER SCORES
ADD COMMENTS / FEEDBACK

2. Judge Login

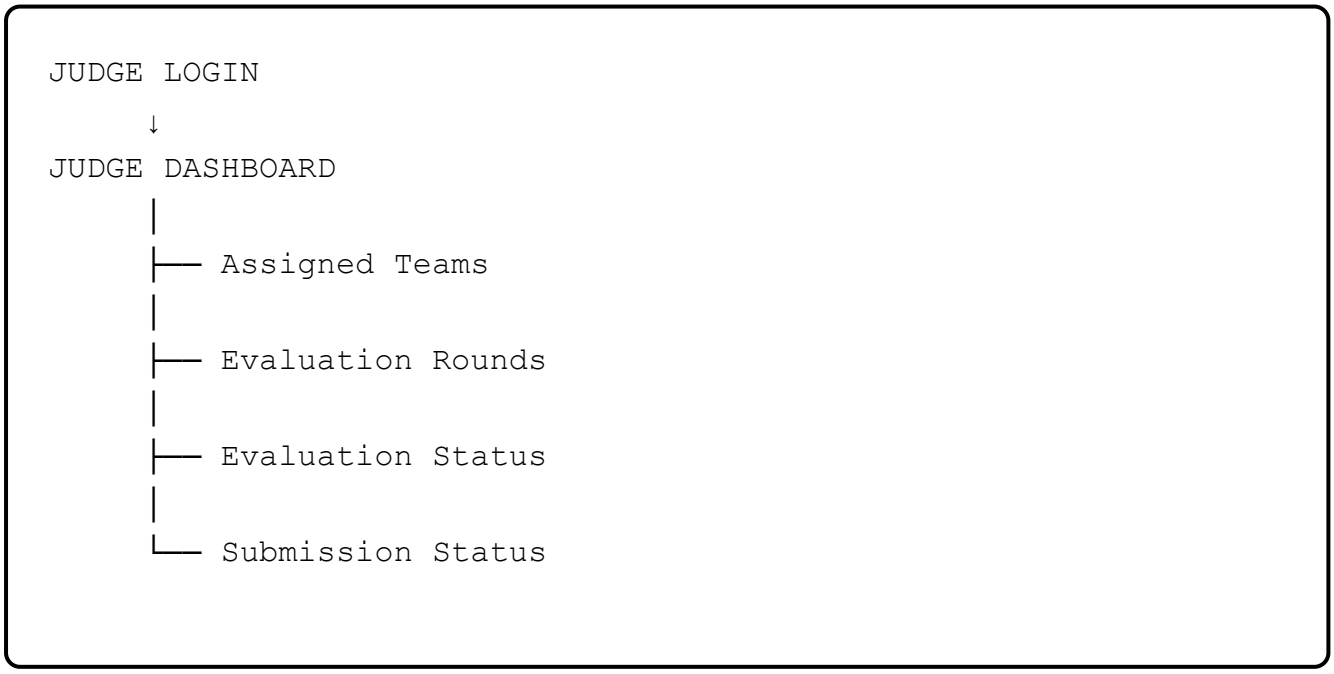

Explanation

Judges use the platform's common authentication system to access the Judge Portal.

After authentication, the system verifies that the user has the Judge role.

Only authenticated Judges can access judging functions.

3. Judge Dashboard

Dashboard Information

- Judge profile
- Assigned teams
- Current evaluation round
- Teams evaluated
- Pending evaluations
- Draft evaluations
- Submitted evaluations
- Evaluation stage status

4. Assigned Teams

```
JUDGE DASHBOARD
      ↓
ASSIGNED TEAMS
      ↓
SELECT TEAM
      ↓
TEAM EVALUATION
```

Explanation

A Judge can evaluate only the teams assigned to them by the Admin.

The Judge does not have access to the complete list of participating teams unless the Admin explicitly configures such access.

Example Assigned-Team List

Team ID	Team Name	Domain	Evaluation Status
IDN26-042	Innovators X	AI & Technology	Pending
IDN26-051	Tech Vision	Healthcare	Submitted
IDN26-063	Future Labs	Sustainability	Draft

5. Team Review

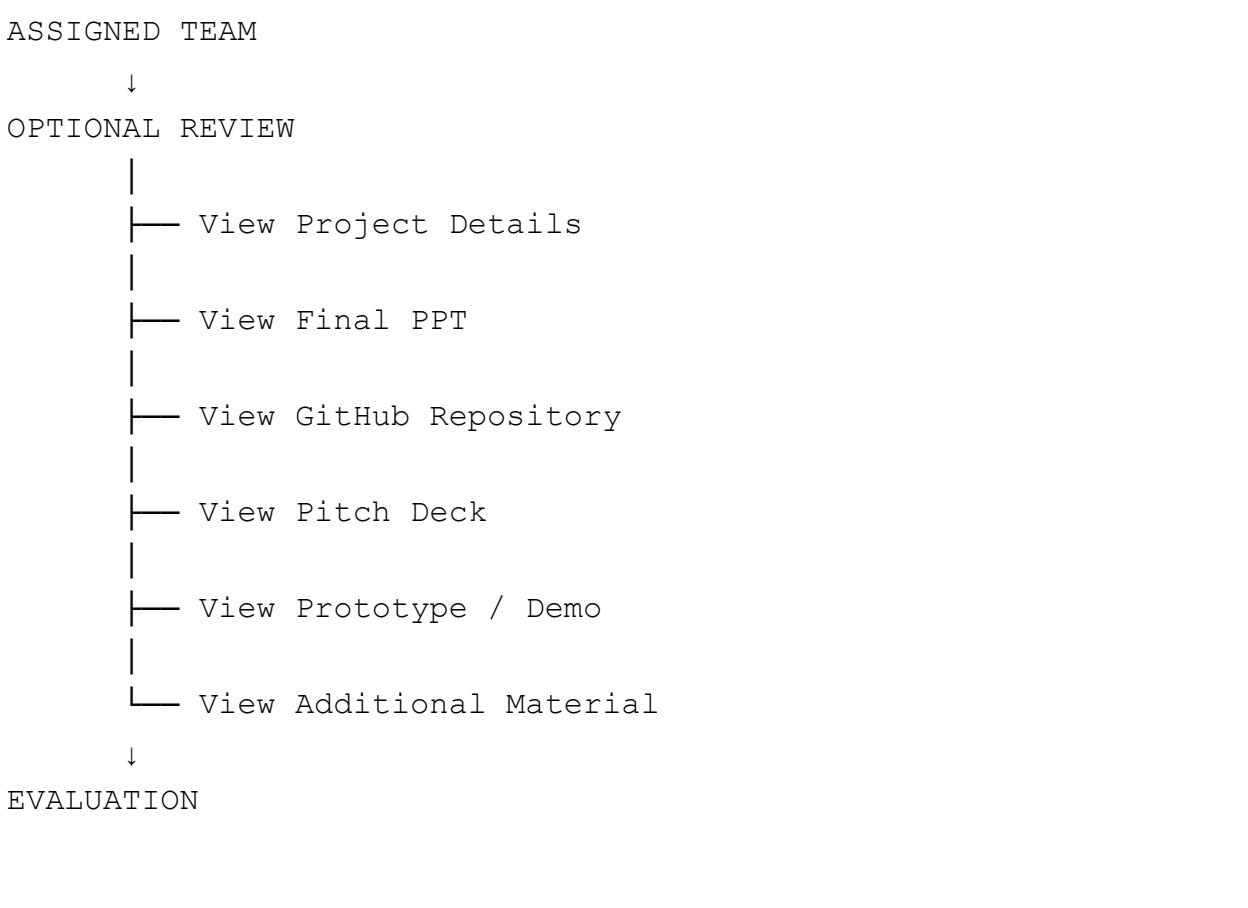

```
SELECT ASSIGNED TEAM
        ↓
TEAM INFORMATION
        ↓
OPTIONAL PROJECT REVIEW
        ↓
OPTIONAL PPT REVIEW
        ↓
OPTIONAL MATERIAL REVIEW
        ↓
EVALUATION
```

Team Information

When a Judge selects an assigned team, the system can display the information required for evaluation.

- Team ID
- Team Name
- Selected Domain
- Project Name
- Project Information
- Final Submission Status

6. Optional Project and Submission Review

Important

Viewing project information, PPT or additional submitted materials should be optional from the Judge Portal. The evaluation form should remain the primary judging function.

The exact materials visible to Judges can be controlled by the platform configuration.

7. Evaluation Rounds

```
ADMIN CONFIGURES
        ↓
NUMBER OF ROUNDS
        ↓
ROUND DETAILS
        ↓
CRITERIA
        ↓
MAXIMUM MARKS
        ↓
JUDGE PORTAL
        ↓
CURRENT ROUND DISPLAYED
```

Dynamic Evaluation Structure

The Judge Portal should not hard-code a fixed number of evaluation rounds.

The Admin controls how many rounds are required and what criteria are used in each round.

The Judge Portal reads the current configuration from the system.

Possible Round Structure

Round	Purpose
Round 1	Initial evaluation
Round 2	Detailed evaluation
Final Round	Final evaluation / presentation

These are examples only. The actual number and names of rounds are controlled by the Admin.

8. Evaluation Criteria

```
ADMIN
  ↓
CREATE / EDIT CRITERIA
  ↓
SET MAX MARKS
  ↓
SET DESCRIPTION
  ↓
SAVE
  ↓
JUDGE SEES CONFIGURED CRITERIA
  ↓
ENTER SCORE
```

Possible Criteria

Criterion	Description
Innovation	Originality and creativity of the proposed idea.
Problem Understanding	Clarity of the problem being addressed.
Technical Feasibility	Practicality and technical implementation potential.
Impact	Potential value or impact of the solution.
Scalability	Ability of the solution to scale.
Presentation	Clarity and effectiveness of the presentation.
Prototype / Demo	Quality and demonstration of the implementation.

Configuration Rule

The criteria above are examples. The Admin can create, edit or delete evaluation criteria and define their maximum marks.

9. Scoring

```
CURRENT EVALUATION ROUND
          ↓
VIEW CRITERIA
          ↓
ENTER SCORE FOR EACH CRITERION
          ↓
ADD FEEDBACK
          ↓
SAVE
```

Judges enter scores according to the criteria configured by the Admin.

The system should validate that the entered score does not exceed the configured maximum marks.

The exact calculation of totals or weighted scores should follow the evaluation configuration defined by the Admin.

10. Comments and Feedback

```
SCORE CRITERIA
      ↓
ADD COMMENTS
      ↓
ADD FEEDBACK
      ↓
SAVE DRAFT
```

Judges can provide comments or feedback associated with their evaluation.

Feedback can be used to explain the reasoning behind scores and provide useful observations about the team's project.

11. Save Draft

```
JUDGE ENTERS SCORES
        ↓
ADDS FEEDBACK
        ↓
SAVE DRAFT
        ↓
EVALUATION STATUS = DRAFT
        ↓
JUDGE CAN RETURN LATER
        ↓
CONTINUE EDITING
```

Judges should not be forced to complete an evaluation in a single session.

A Judge can save an incomplete evaluation as a draft and return to it later.

12. Review Before Submission

```
DRAFT
  ↓
REVIEW EVALUATION
  ↓
CHECK SCORES
  ↓
CHECK FEEDBACK
  ↓
CHECK REQUIRED FIELDS
  ↓
READY TO SUBMIT
```

Review Should Check

- All required criteria have scores.
- Scores are within configured limits.
- Required comments are provided.
- Correct evaluation round is selected.
- Correct assigned team is being evaluated.

13. Submit Evaluation

```
REVIEW COMPLETE
      ↓
SUBMIT EVALUATION
      ↓
VALIDATION
      ↓
EVALUATION SAVED
      ↓
STATUS = SUBMITTED
      ↓
EVALUATION LOCKED
```

Evaluation Lock

Once an evaluation is submitted, it should normally become locked so that the Judge cannot silently modify the submitted evaluation. If a correction is required, the Admin can explicitly reopen the evaluation according to the system rules.

14. Evaluation Status

Status	Meaning	Judge Action
Not Started	Evaluation has not been started.	Start evaluation.
Draft	Evaluation has been started but not submitted.	Edit and continue.
Submitted	Evaluation has been submitted.	Normally locked.
Reopened	Admin has reopened the evaluation.	Edit and resubmit.

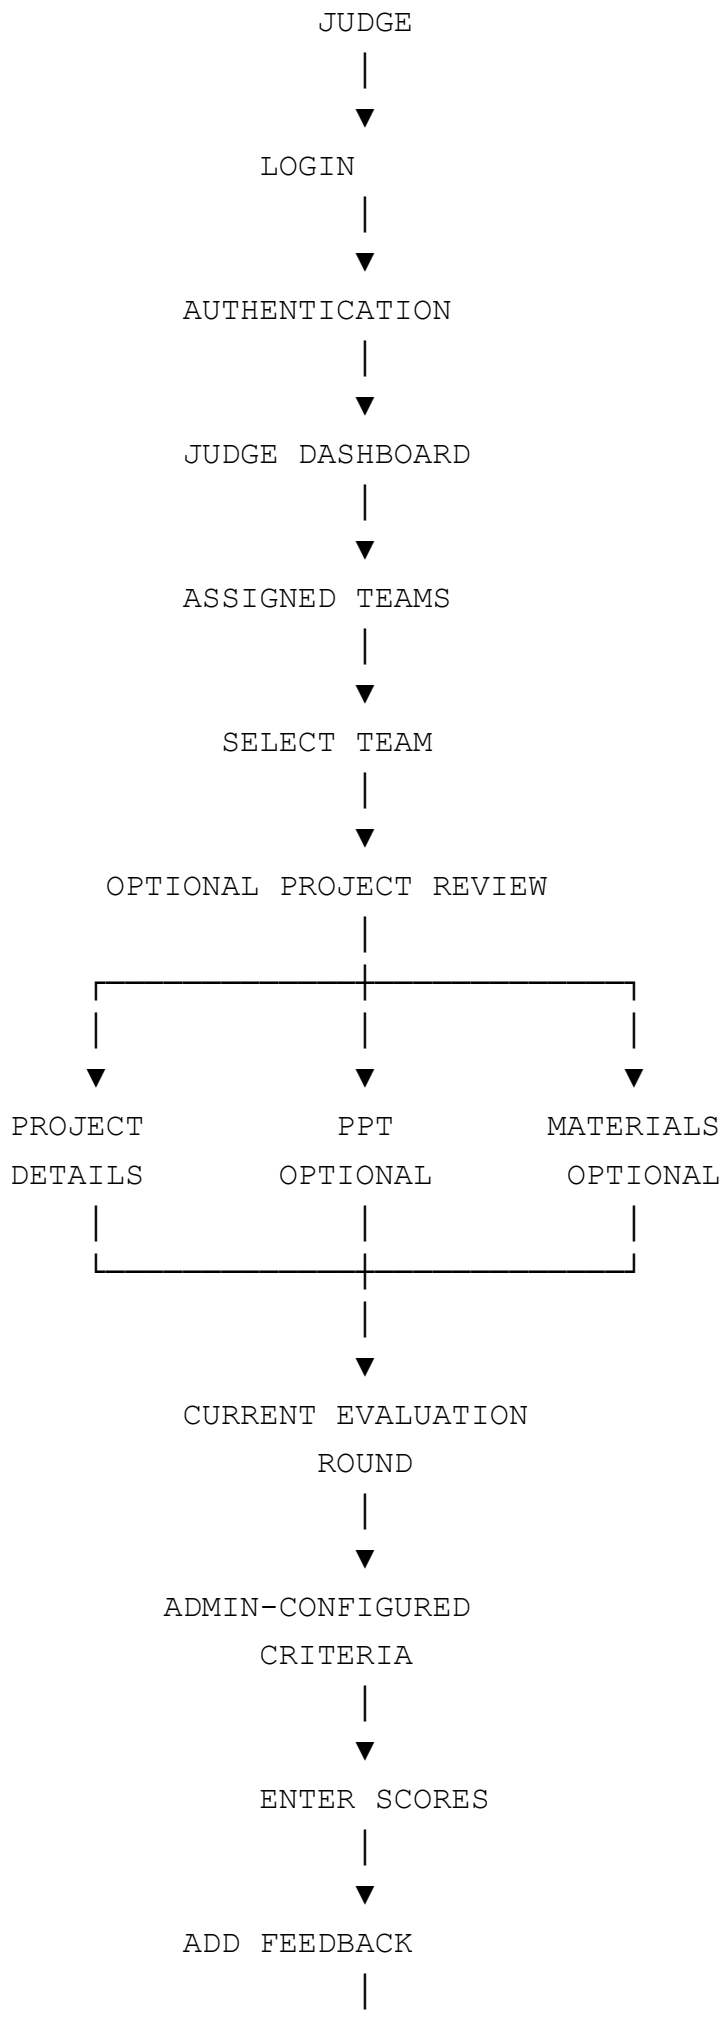

15. Judge Portal Navigation

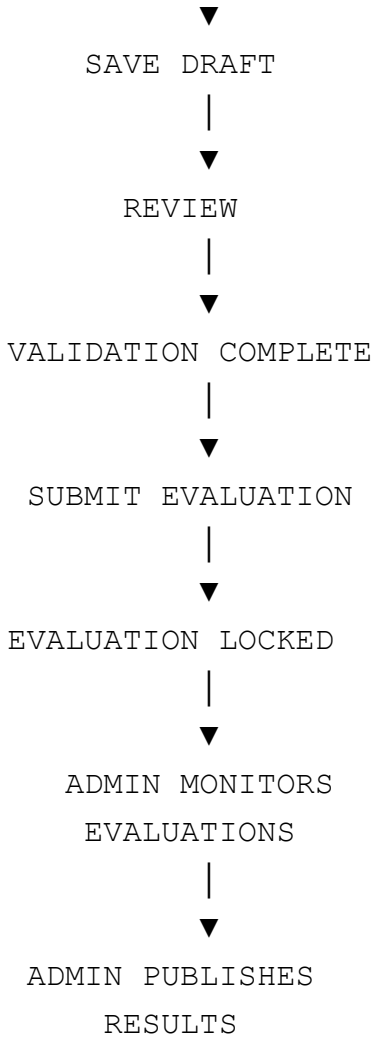

```
JUDGE PORTAL
│
├── Dashboard

16. Judge Permissions

Action	Judge
Login	Allowed
View own Judge Dashboard	Allowed
View assigned teams	Allowed
View project details	Optional / Configurable
View final PPT	Optional / Configurable
View submitted materials	Optional / Configurable
Enter scores	Allowed
Add feedback	Allowed
Save draft	Allowed
Submit evaluation	Allowed
Modify evaluation criteria	Not Allowed
Create evaluation rounds	Not Allowed
Assign judges	Not Allowed
View all teams	Not Allowed unless explicitly permitted
Publish results	Not Allowed
View Admin dashboard	Not Allowed

17. Complete Judge Evaluation Flow

JUDGE
LOGIN
AUTHENTICATION
JUDGE DASHBOARD
ASSIGNED TEAMS
SELECT TEAM
OPTIONAL PROJECT REVIEW
PROJECT DETAILS
PPT OPTIONAL
MATERIALS OPTIONAL
CURRENT EVALUATION ROUND
ADMIN-CONFIGURED CRITERIA
ENTER SCORES
ADD FEEDBACK

18. Judge Portal Security and Access Control

Assigned-Team Restriction

Judges should only be able to access teams assigned to them.

Role-Based Authorization

Login alone should not be enough to perform judging actions. The backend must verify the Judge role before allowing evaluation operations.

Server-Side Validation

Scores, evaluation status, assigned team and evaluation round should be validated by the backend rather than relying only on frontend restrictions.

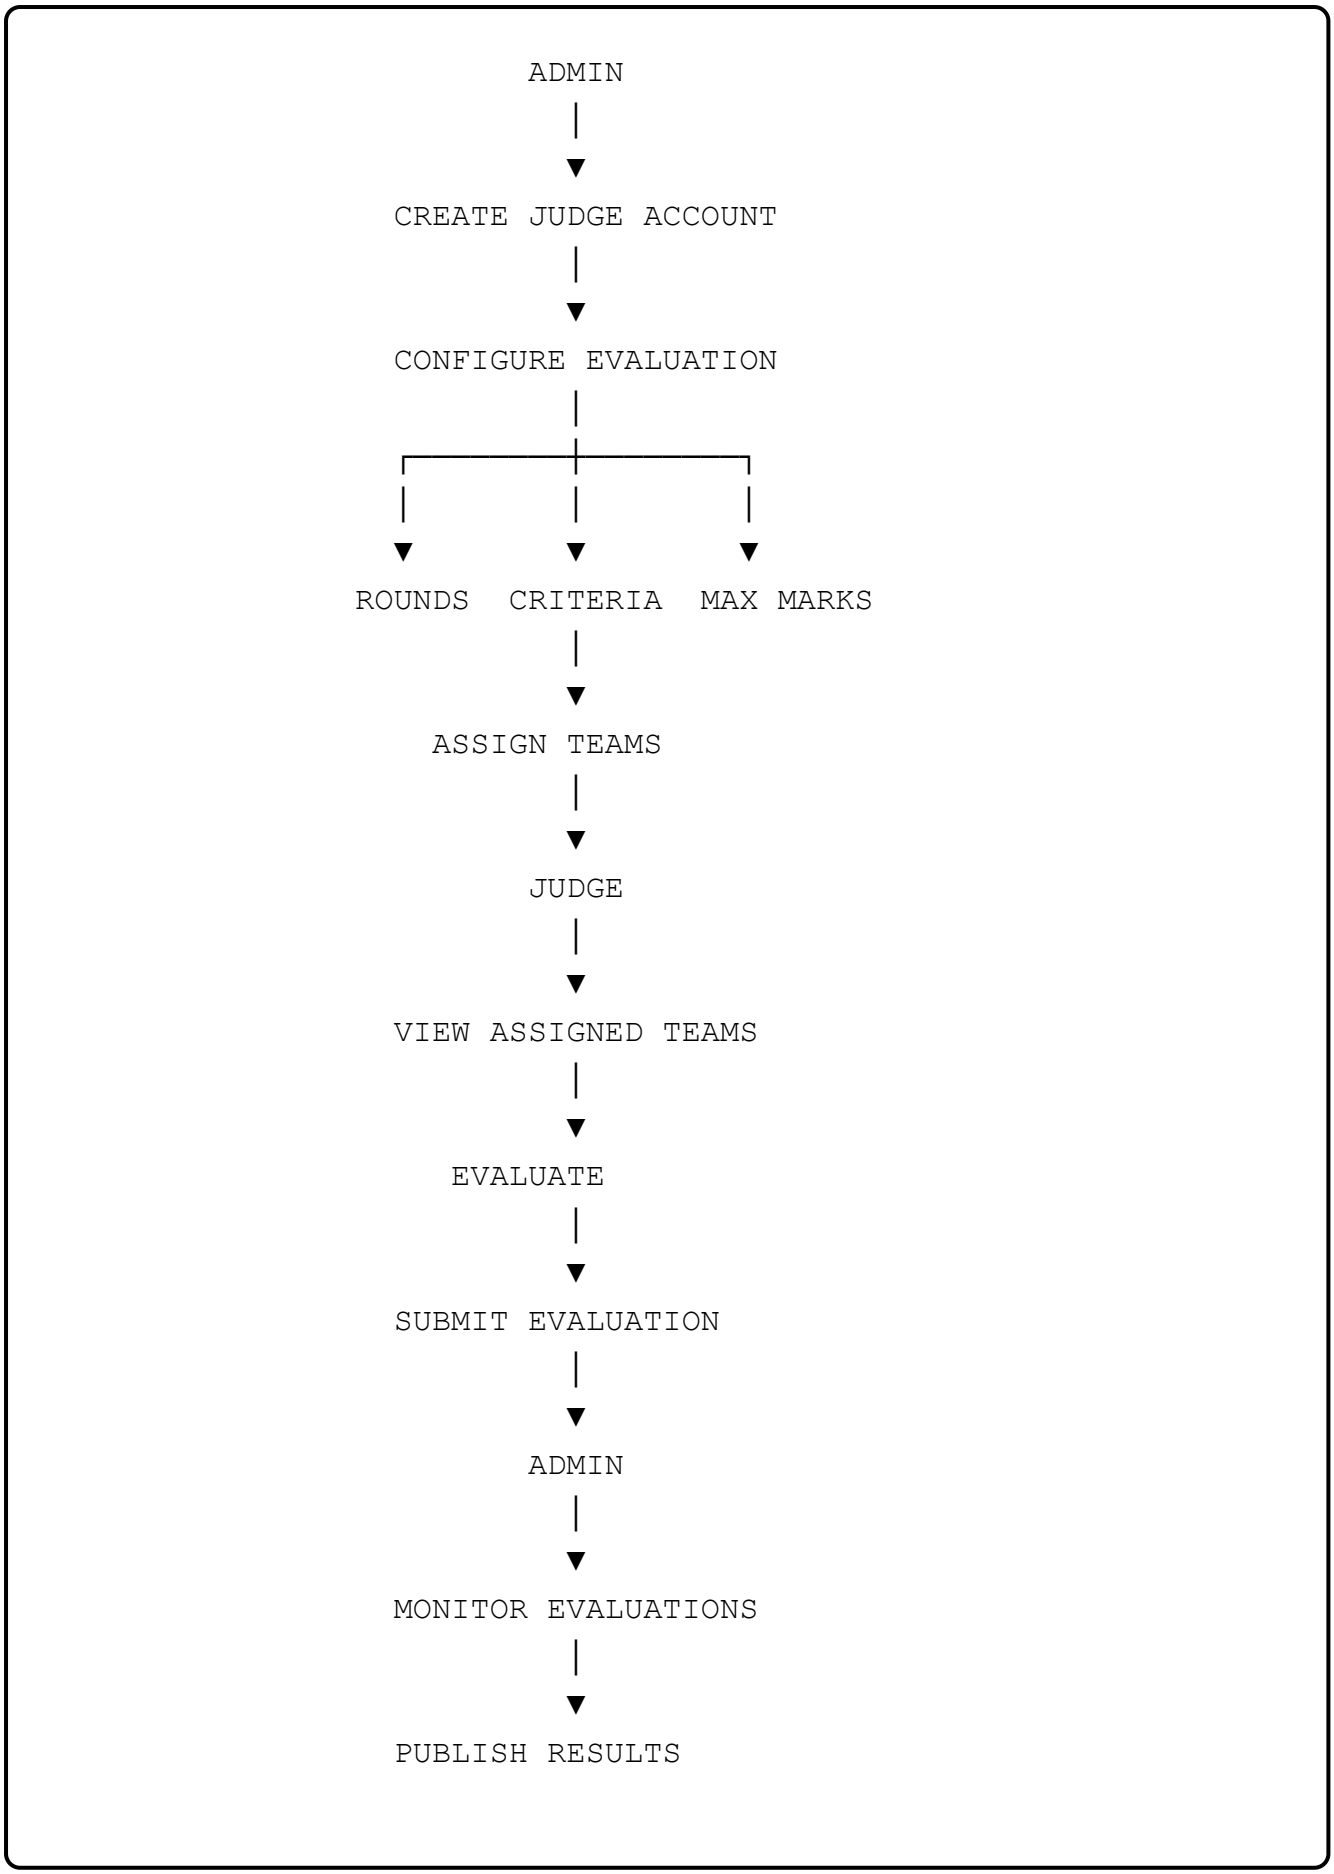

Evaluation Locking

Once submitted, an evaluation should be locked unless the Admin explicitly reopens it.

Audit Logging

Important judging actions should be recorded, including evaluation creation, draft saves, submission and Admin reopening where applicable.

19. Admin to Judge Flow

20. Dynamic Evaluation Management

Admin Controls

- Number of evaluation rounds
- Round names
- Round descriptions
- Evaluation criteria
- Maximum marks
- Criterion descriptions
- Required or optional criteria
- Round open/close status

```
ADMIN
  ↓
EVALUATION MANAGEMENT
  ↓
NUMBER OF ROUNDS
  ↓
CREATE / EDIT ROUNDS
  ↓
CREATE / EDIT CRITERIA
  ↓
SET MAX MARKS
  ↓
SAVE
  ↓
JUDGE PORTAL
  ↓
LOAD CURRENT CONFIGURATION
```

Important Design Rule

The Judge Portal must not hard-code the number of rounds or evaluation criteria. The evaluation interface should be generated from the configuration stored by the Admin.

21. Judge Responsibilities

Judge Can

- Login to the Judge Portal.
- View assigned teams.
- Open assigned team information.
- Optionally view project details.
- Optionally view final PPT.
- Optionally view additional materials.
- View current evaluation criteria.
- Enter scores.
- Add comments.
- Add feedback.
- Save evaluation as draft.
- Review evaluation.
- Submit evaluation.

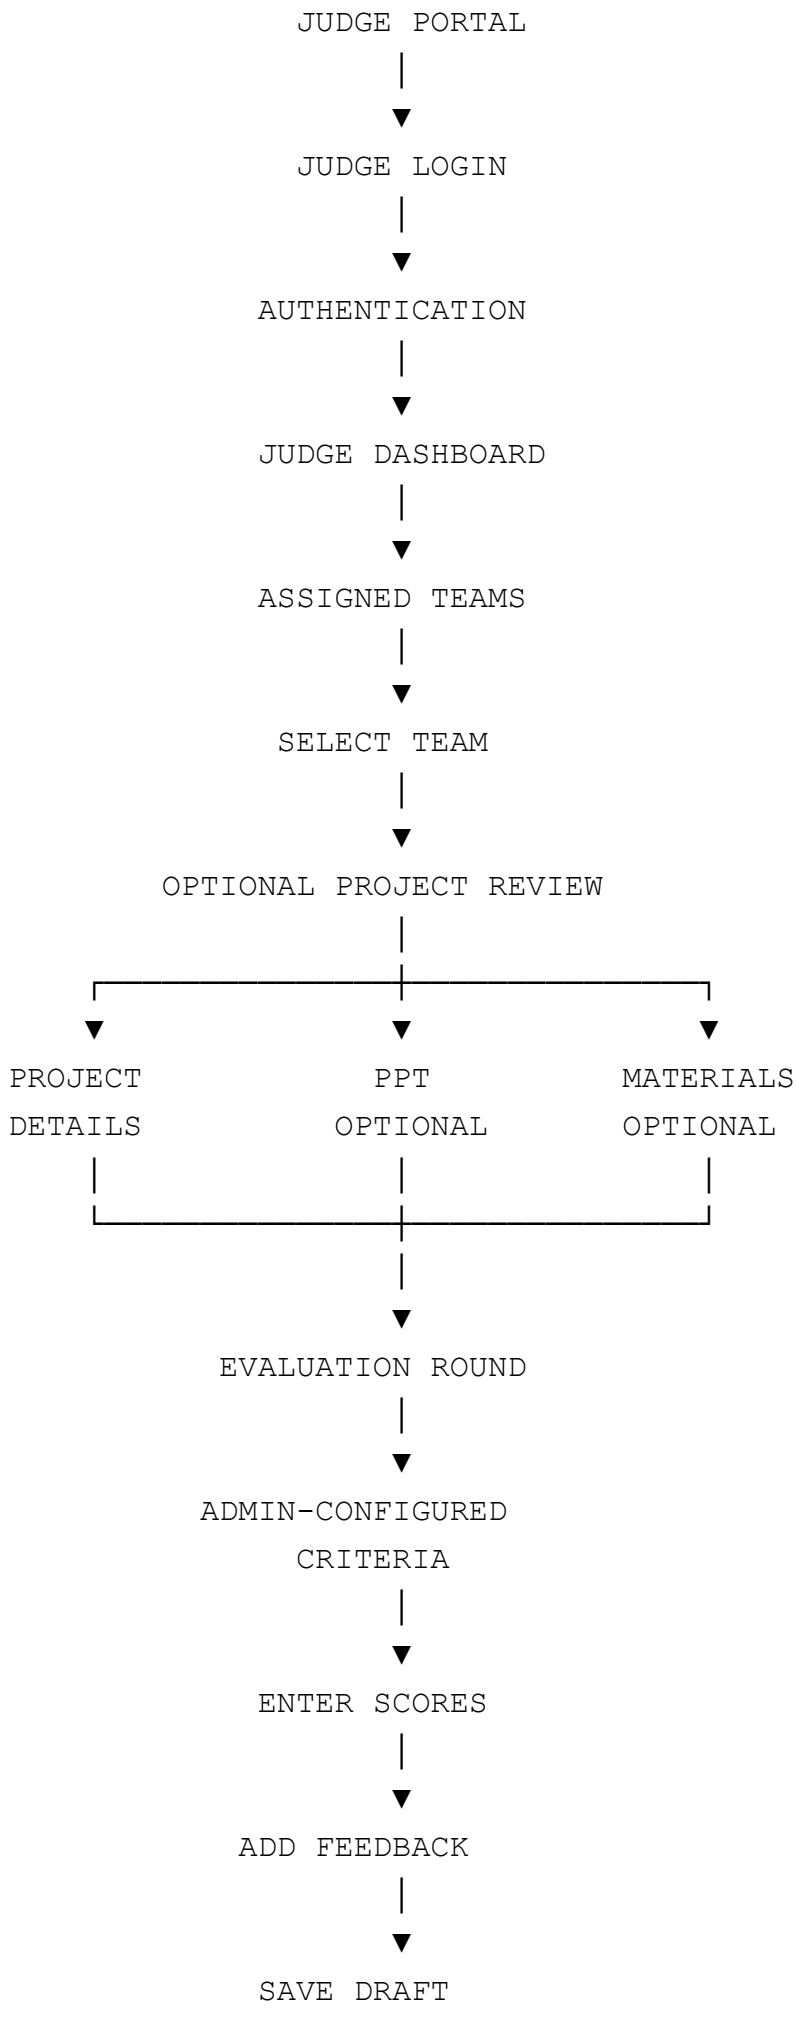

Judge Cannot

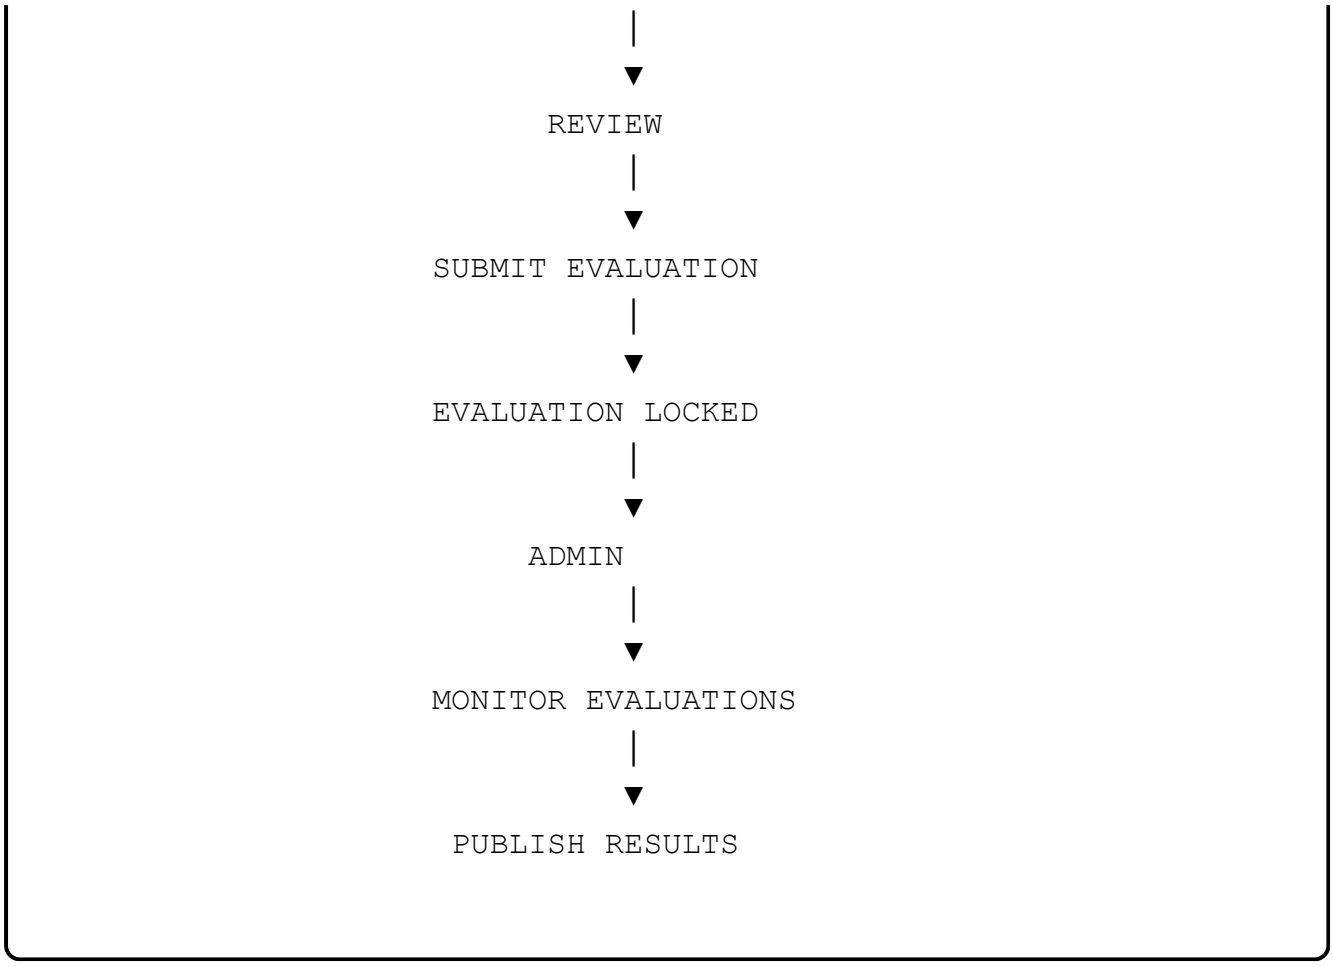

- Create evaluation rounds.
- Change evaluation criteria.
- Change maximum marks.
- Assign judges.
- Approve payments.
- Change team information.
- Change SPOC assignments.
- Publish results.
- Access Admin functions.
- Evaluate unassigned teams.
- View restricted internal system information.

22. Judge Portal — Functional Summary

Module	Judge Function
Authentication	Login and logout
Dashboard	View judging status and assigned teams
Assigned Teams	View only assigned teams
Project Review	Optional access to project information
PPT Review	Optional access to final PPT
Materials	Optional access to additional submissions
Evaluation Rounds	Use Admin-configured rounds
Criteria	Use Admin-configured criteria
Scoring	Enter marks according to configured limits
Feedback	Add comments and evaluation feedback
Draft	Save incomplete evaluation
Submission	Submit completed evaluation
Evaluation Lock	Submitted evaluation becomes locked unless reopened

23. Final Judge Portal Flow
